A Gothenburg business, Dawson Tire & Wheel, has the exclusive distributorship of Trelleborg agricultural and forestry tires.

As a master distributor, the business stocks Trelleborg tires in its Nebraska and Indiana locations for sale in Illinois, Indiana, Texas, Kansas, Nebraska, Colorado, Ohio, Michigan and New York.

Trelleborg tires, which Dawson Tire & Wheel marketing coordinator Loren Block said are manufactured in Italy, have earned an international reputation for quality and performance.

The tires are original equipment on John Deere, Cat, CaseIH, New Holland, Fendt and Agco brands of agriculture equipment.

Trelleborg is well known for its deep tread, improved mud cleanout, traction and ride. The tires also have high speed ratings and stand up extremely well to tough stubble conditions, officials said.

“The Trelleborg production process is fully automated which guarantees that each and every tire is a true commitment to quality” said Terry Morris, general manager for Dawson Tire & Wheel. “Innovation in rubber is a core competency of Trelleborg.

Morris added that Trelleborg has an incredible research and development department that has created new technology and compounds in the tire industry that stand up to tough conditions and provide outstanding traction and tire life.
